

Missing Single Tooth Options

Unilateral Removable Partial

- Take out each night to clean and allow tissues to rebound, do not have to cut/prepare teeth on either side of the space
- Works well as a permanent solution or as a temporary solution until you are ready for implant or bridge
- Cost is about \$1200 (depending on insurance), 1-3 short appointments (takes about 3-5 weeks to complete process)

3-Unit Bridge

- Permanently cemented in place; you do not have to remove from mouth
- We cut or prepare the teeth on either side of the space to prepare for crowns/bridge
- Cost is about \$3400 (depending on insurance), 1 long appointment followed by one shorter appointment (4 weeks apart)

Implant

- Process takes about 3-9 months to complete, an oral surgeon/periodontist will extract the tooth and place the implant. At least 3 months of healing before starting crown placement (crown placement is two 1 hour appointments, 4 weeks apart)
- Do not have to cut/prepare surrounding teeth* (minor adjustments to adjacent teeth may be necessary)
- Cost is about \$4000-6000 (Depending on insurance and oral surgery cost)
- Like getting your tooth back
